The Oracle CPQ 20A Patch 2 document provides a high-level description of the bug fixes included in this update. This document also provides information on supported and certified browsers. For more information on 20A features, please see the Oracle CPQ 20A What’s New document.

HOT FIXES

| Bug ID | Description | Resolution |
|----------------------|--|---|
| BML | | |
| 31219366 | With BML Compiler Optimization enabled, when a BML variable was assigned to itself (e.g. "a=a;") the value was blank. | With BML Compiler Optimization enabled, when a BML variable is assigned to itself (e.g. "a=a;") the value populates correctly. |
| 31220289 | When performing a BML query on a Data Table with a column titled "Values" an error displayed. | When performing a BML query on a Data Table with a column titled "Values" displays the data in the Values column. |
| 31246837 | In BML, when concatenation was used to assign a value to a string and then assigned the same string another value, the last value assigned was not retained. | In BML, when using concatenation to assign a value to a string and then assigning the same string another value, the last value assigned is retained. |
| Commerce | | |
| 31220316 | When Approve and Reject actions were invoked, the Current Reason values were not populated. | When Approve and Reject actions are invoked, the Current Reason values are populated. |
| 31234630 | In Transaction JET UI with Collaborative Editing enabled, a Transaction with a Transaction array added blank lines. | In Transaction JET UI with Collaborative Editing enabled, a Transaction with a Transaction array displays properly. |
| 31219392 | In Legacy UI, when a part was added to a Transaction using Quick Key, the part description field did not populate until the Transaction was saved. | In Legacy UI, when a part is added to a Transaction using Quick Key, the part information, including the part description populates. |
| Configuration | | |
| 31219407 | In Legacy UI an array Single Select Pick List that had a filter condition and a recommendation rule to force set the array caused the Configurator to be unresponsive. | In Legacy UI an array Single Select Pick List that has a filter condition and recommendation rule to force set the array, the Configuration Actions are responsive. |

| Bug ID | Description | Resolution |
|---------------------|---|--|
| 31220275 | In JET UI when a Single Select Menu value had a recommendation rule and constraint value for another Single Select Menu attribute, occasionally the new value recommended was hidden (by the constraint rule) which caused JET UI to either select the first option displayed or leave the value unchanged. Thus, the value of the Model in the Pipeline Viewer and the value displayed on the Menu are not the same. | In JET UI when a Single Select Menu value had a recommendation rule and constraint value for another Single Select Menu attribute, the value of the Model in the Pipeline Viewer and the value displayed on the Menu are the same. |
| 31220297 | In JET UI when a Configuration array index was added using the '+' icon after the size was set by a recommendation, an error displayed. | In JET UI adding a Configuration array index using the '+' icon functions properly. |
| 31329933 | When a change to a Single Select Pick List array attribute was made, subsequent instances of the attribute were set to blank. | When a change to a Single Select Pick List array attribute is made, subsequent instances of the attribute are unaffected. |
| Reporting | | |
| 31212781 | A report scheduled to run weekly on a specific day of the week ran the following day. | A weekly scheduled report runs on the specified day of the week. NOTE: If a weekly reports are running on the wrong day, this can be resolved by removing and re-adding the schedule. |
| 31306404 | Users received duplicate emails for the same scheduled report after updating it. | Users receive one email for each scheduled report. NOTE: If users are already receiving duplicate emails, this can be resolved by removing and re-adding the schedule. |
| Upgrade | | |
| 31220329 | The schedule of report notification emails were deleted during the upgrade process. | The schedule report notification emails are maintained through the upgrade process. NOTE: If users are receiving duplicate emails, this can be resolved by removing and re-adding the schedule. |
| Web Services | | |
| 31249014 | The WSDL for Get Transaction, Create Transaction, and Add to Transaction APIs did not include array set attribute values. However, SOAP ver 2.0 APIs included array set attributes. | The WSDL for Get Transaction, Create Transaction, and Add to Transaction APIs now includes array set attribute values. |

BROWSER SUPPORT

Oracle CPQ supports all browser versions that meet the criteria of the Oracle Software Web Browser Support Policy.

If you experience issues using a supported browser version, open a ticket on [My Oracle Support](#) to resolve the issue. If an issue arises when using a supported browser, use a certified browser version until a fix is delivered. Certified browsers are selected based on current market share and are thoroughly tested to work with the current version's standard functionality.

Certified Browsers

Windows

Google Chrome 79.x

Mozilla Firefox 71.x

Internet Explorer 11.x

IMPORTANT: Compatibility issues with the selected browsers may exist when sites contain additional JavaScript, alternate CSS, or other custom functionality. Customizations may require add-on work. Contact [My Oracle Support](#) to determine the availability of workarounds and minor fixes.

TRAINING

To see all new functionality and known issues between your current version and the version to which you are upgrading, refer to the What's New documents. To familiarize yourself with the new features introduced in Oracle CPQ 20A, Oracle strongly recommends referring to the Oracle CPQ Administration Online Help. For additional assistance, please see [My Oracle Support](#). Verify any information not explicitly mentioned in the release notes as supported by the software against the Oracle CPQ Administration Online Help or with the Oracle CPQ Consulting team.

CUSTOM JAVASCRIPT

If customers have added custom JavaScript that leverages the Document Object Model structure or specific elements, classes or IDs, this customization should be thoroughly tested and may require refactoring. For more information about custom JavaScript, go to Style & Templates > JET JavaScript Customization in the Oracle CPQ Administration Online Help.

DISCLAIMER

This 20A Patch document contains high-level information and does not function as a specification or replace the Product Help or User Guide. Upgrading to a subsequent update may require modifications to integration XML or APIs or the re-deployment of Commerce Processes, Configurations, or global function settings.

MIGRATION

When migrating from one site to another using the Migration Center or Migration Packages, both sites must use the same major update. The migration of content can only occur across minor updates within the same major update. Migration across major updates cannot occur.

- “Major update” = Update 20A
- “Minor update” = Update 20A Patch 2

NOTE: Bug ID numbers correspond to Oracle BugDB numbers.
